

GeMCRIS Brochure

This brochure provides information on the GeMCRIS system, an interactive database for human gene transfer (HGT) clinical trials.

GeMCRIS serves as a public information resource, a system to facilitate the reporting of adverse events (AEs), and an analytical tool for NIH and FDA to evaluate safety data from HGT trials.

Up to 50 brochures are available free of charge. Requests can be sent to the NIH Office of Biotechnology Activities by email at:
